

Waterways Excursion

On Thursday the 16th of March, we went to a beautiful leaning atmosphere called Bowie creek Dip Bridge. We did activities. We did it because it was part of our resource smart school policy. We went with our cluster schools. When we got there, we put our bags on the solid ground.

First, we did the bird activity. As we learned about the knowledge of this wonderful feathered flying creature that lives in our wonderful environment of society. It was a bird. We had to recognise each bird in the Victorian environment. Then we had to match each bird with its call.

Then we went to the fisheries. We were talking about the fish we can find from Goulburn to the murray. Then we got a ruler with the measurements of the fish that you can catch, and where they are found, and the limit of how much you can carry. Then we went to the cultural awareness. Which told us a lot about the history of the land.

Next, we visited the bugs section of the excursion, and it was interesting. First, we looked about the bugs you can find in your backyard and bugs on trees as well. Then we went to the forest brigade. They told us about fire safety and what we can do to prevent bush fires. Then we went inside the fire truck, it was fantabulous.

After that, we had lunch. We had a sausage in bread with red sauce (AKA tomato sauce) then we were fishing for fish with a fishing rod. Dan got it snagged on the sticks on his first cast. Also on the other hand Nick casted with a slightly smaller rod then he is used to, so I did pretty well. Then it was Zane. The first cast I did was good, I got a bite but I did not reel it in quick enough. Then we went back to school on the bus.

By Dan, Nick and Zane.
